Flock therapy after diagnostics

*Trichosporon asahii*

- Supportive care – try to reduce stress in your aviaries
- Anti-microbial therapy – Amoxicillin Clavulanic Acid – Amoxicillin syrup 2ml/100ml or 20ml/1L of drinking water for 8 days
- Anti-fungal therapy – Ketoconazole – Anti – Fungal syrup 2ml/100ml or 20ml/1L of drinking water for 21 days

- Probiotic after the Amoxicillin treatment in drinking water every second day – Forever??

- **PLEASE NOTE: THE TREATMENT CAN CAUSE ANOREXIA**

- Observation and management of your aviaries is very important. Any birds showing loss in apatite, nervous symptoms, lameness, etc. need to get to your bird vet as soon as possible.
