How to make a Facebook post

Step 1: Open your Facebook page. At the top of your News Feed there is box where you can enter your post content. There will generally be a phrase like "Write something" or "What’s on your mind?" in the box.

Step 2: Add text to your post. Tap the text field, then type in the text for your post. You can use the content that is provided in the READ ME 1 document for the post text.

Step 3: Upload one of the photos of the World Veterinary Day campaign. Tap Photo/Video near the middle of the post screen, then select a World Veterinary Day photo to upload (provided in the folder) and tap Done. Doing so adds the photo to your post.

Step 4: Tap Post. Doing so will create your post and add it to your page.
