What is a WhatsApp status?

WhatsApp Status is a status update that disappears after 24 hours of you uploading it. You can share photos, videos, text, links, and GIFs. Have a look at people’s statuses on your WhatsApp by navigating to the status tab in the middle of the menu bar.

How to create a WhatsApp status?

Step 1: Download the World Veterinary Day images on your phone.
Step 2: Tap on My Status. If you’ve already got a status, tap the little circle with a + sign on the top right.

Step 3: You will see that the images will appear in the easy-to-access gallery. Tap on the one you would like to feature for that day. If you do not see the images in the easy-to-access gallery, swipe up. You will automatically have access to your phone gallery to choose the specific image. If you can’t find the image here, please make sure that you uploaded the images to your phone.

Step 4: Add a caption if you want by tapping on Add a caption, and then tap on the Send icon at the bottom right.

Step 3: After you have published your status image, you can tap on it to view, or press the menu button on the right side to check how many people have seen the update, or to forward it.

Please remember:
• The WhatsApp status will disappear in 24 hours.
• All your WhatsApp contacts will be able to see these images.
