An increase in robberies of veterinary practices

We have been made aware of an increase in robberies of veterinary practices where cash, drugs and vehicles are taken. The modus operandi appears to be two individuals, male and female, that visit the practice and enquire about vaccinations for a pet. Whilst one is talking to and distracting a veterinarian, the other asks to visit the bathroom. The person claiming to visit the bathroom will then try to obtain any items from the practice.

This is not a new approach but please request your staff to be vigilant.

Pretoria Area

We are aware of two individuals, male and female, driving a silver Toyota Yaris, registration number BM 58 WR GP currently active in the Pretoria area.

Kind regards
Gert Steyn : Managing Director SAVA
