St Francis Veterinary Hospital in Edenvale

On the 24th October 2018 at 17:15 pm St Francis Veterinary Hospital in Edenvale was robbed at gunpoint.

The gang consisted of 4 African men and 1 white female.

3 of the 4 men are tall and large in size wearing caps, the 4th male is short with no cap. The women is short and medium sized, with brown curly shoulder length hair, wearing a cap and carrying a very large handbag containing the firearms (x3).

They gain entry using the white female acting as a client, once the female gains access to the premises she purposely leaves the security gate opened and is followed in by the remaining 4 African men who held the staff at gunpoint and stripped them of their personal belongings and practice cash.

The white women leaves the building immediately after the African men enter to setup the getaway car.

The gang arrives in a white bakkie with a canopy.

Unfortunately, Ken Valley Vet was also a victim a few weeks back and the intruders match the above description.

We hope that by sharing this information we create awareness amongst the community.

Kind regards,
Michelle
Secretary, JHB Branch
