Veterinary technology: 
Training under the microscope

What subjects should be included in the curriculum for veterinary technology with a view to improve laboratory services rendered to the veterinary professions?

Dear Colleagues

We need your input on this matter.

What skills do you need from a registered veterinary technologist when you employ a veterinary technologist and/or what services do you expect from veterinary laboratories?

Please assist the Education Committee who is revising the minimum standards of training for veterinary technologists.
Please see the current Table 9 (regulations) and the revised version (Table 9 revised) outlining the subjects covered in the training of veterinary technologists.

Do you agree with the revised standards? Do you wish to add anything?

Kindly submit your input, with the subject line TABLE 9 INPUT, to Ms Leonie Westcott education@savc.org.za by no later than 20 July 2017.

We really need your input.

With appreciation
Dr Anthea Fleming
Chairperson, Education Committee
